Summary

Full Stack Developer with 3+ years of experience in Python, JavaScript frameworks, and SQL. Proficient in developing and maintaining web applications, with a strong focus on both front-end and back-end development. Skilled in modern technologies and frameworks, able to troubleshoot and debug complex issues, and committed to producing high-quality code. Successfully released own mobile game and developed a Chrome browser extension. Able to adapt quickly to new projects and technologies.

Experience

SPC - Student Price Card

Vaughan, ON, Canada

Full Stack Developer

Oct. 2020 – present

- Owned and developed a Vue.js Chrome browser extension with 2000+ active users and a 5-star rating that reminds users about available discounts and automatically applies them on checkout
- Improved the subscription renewal logic and updated the cancellation flow by optimizing and enhancing API which led to a 90% decrease in multiple charges, a decrease in failed renewals, and increased reliability of the billing system overall
- Implemented unit testing on the backend using Python and Flask framework that helped to prevent potential bugs, made the code we deploy more reliable, and saved time and money in the long run
- Managed QA Specialist, organized all test-related tasks, reviewed automation code, and helped him on his path to becoming a developer. Utilized strong communication and leadership skills for guidance and support

GreenGeeks

Agoura Hills, CA, United States

Full Stack Developer

Jan. 2020 – present

- Built a fully functional ticketing system in PHP for Customer Support that allows staff members to open, view, prioritize, and respond to tickets, and saves thousands of dollars by not using third-party tools
- Designed and developed a dynamic schedule and time off system for 100+ of the company employees with a user-friendly interface to request and manage their schedules, and for managers to approve or deny requests
- Developed a global news system featuring Markdown formatting integration, permissions and multiple teams support, and Slack notifications
